

ARION SCH-Z [CHORUS/VIBE] MOD

Many professional musicians use the Arion Stereo Chorus due to its unique tone. However, there have been many requests to modify the pedal to make it more durable as well as better sounding. Highly skilled engineers at EWS Japan have crafted special modifications to meet the musicians with a keen ear.

DC Power Jack :

Connect AC adapter. Use the dedicated 9VDC, 100mA~200mA adapter. Improper adapter can cause damage. (Center negative)

Status LED :

Indicates the unit is on or off. Replace battery when the LED is dim.

Mode Switch :

Switch between Chorus and Vibe mode.

When "chorus" is selected, the unit is on normal SCH-1 Chorus mode.

The Vibe mode emulates a deeper pitch shifting chorus/vibrato effect.

※ Output Jack (Out 2) :

OUT2 is no longer available due to this MOD.

Output Jack (Out 1) :

Connect cable from this output jack into the input of the amplifier.

Battery Cover :

Press both ends marked "push" and lift the cover for access to battery compartment. When not in use over period of time disconnect battery to prevent battery leakage.

Power Source :

Either 9VDC battery(006P) or 9VDC power adapter can be used.

※ Please only use the regulated negative tip 9VDC power adapter.

Rate :

Rate control determines the speed of the chorus effect. It is increased when turned clockwise and decreased when turned counter-clockwise.

Depth :

Depth control gives more intensive sound to chorus. This effect is increased when turned clockwise and decreased when turned counter-clockwise.

Tone :

Controls tone quality of chorus effect. The high frequency range is decreased when turned counter-clockwise.

Input Jack :

Plug electric guitar or other electronic instruments. Remove plug when not in use for prolong battery life.

Footswitch :

Press pedal down for on position. LED will be on. Depress again for off position. LED will be off. When the unit is off, the signal passes straight through without any effect. (Hard wired true bypass connection)

ARION SCH-Z [CHORUS/VIBE] Mod by EWS features

- ※ Heavy Duty 3PDT True Bypass Switching
- ※ Much desirable SCH-1 Tone Circuit
- ※ Super bright blue LED Indicator
- ※ Switchable Chorus and Vibe mode

Note : OUT2(STEREO) is no longer available due to this MOD.
